## Abstracts

Bio-pesticides are certain types of pesticides derived from such natural materials as animals, plants, bacteria and certain minerals. With people's rising awareness of environmental protection and food safety, more and more attention has been paid to bio-pesticide, which enjoys advantages of no pollution, no residue and high efficiency. So bio-pesticide has bright market outlook in the future. At the end of 2010, there were approximately more than 2,500 registered bio-pesticide active ingredients and 250 products.
