## Abstracts

As one of the top six plant hormones, gibberellic acid is mainly used as a plant growth regulator in crops such as rice, cotton, wheat and economic crops. In recent years, gibberellic acid has been widely used in hybrid rice breeding, which has become an important technology in fine rice seed selection method.

Overview of Gibberellic Acid in China is CCM International's first edition report on Chinese gibberellic acid industry, finished in April 2011. This intelligent report attaches importance to the following parts:

Supply of gibberellic acid (capacity, output, key manufacturers), consumption (volume & value) in China, 2008-2010;

Current registration situation;

Raw materials of gibberellic acid in China;

Production technology of gibberellic acid;

Price of gibberellic acid technical and formulations, 2006-2010; export, 2010;

Forecast on Chinese gibberellic acid supply, demand, export, 2011-2015.
