Abstracts

China's pesticide production capacities are mainly distributed in Jiangsu Province, Zhejiang Province and Shandong Province with stricter environmental protection supervision. In recent years, pesticide enterprises have accelerated their external expansion. Pesticide capacities are shifting from the eastern China to the western and central China with advantages in land, resources and policies. Besides, most of the new projects abide by national regulations to enter the standardized chemical park.

There are three main driving factors that promote the migration of enterprises in China. The relatively low labor cost in central and western China is one of the important factors for successfully attracting enterprises in eastern China. Besides, increasing environmental protection pressure forces China's pesticide industry to migrate, moving to areas with strong environmental carrying capacity. Furthermore, the shortages of land and energy drive enterprises to move to regions with relatively abundant land and energy recent years.

In 2020, there are many projects in the environmental impact assessment (EIA) stage, and most of them are proposed projects announced in H2 2020. The projects of pesticide technical and intermediates are the key construction projects, especially in Inner Mongolia Autonomous Region and Ningxia Hui Autonomous Region.

In this report, CCM will analyse pesticide industry migration in China 2020 from the following aspects:

Reasons for migration of China's pesticide industry

Direction of China's pesticide industry migration

Dynamics of migration of Chinese pesticide enterprises in 2020

Contents

Executive summary

Methodology

1 REASONS FOR MIGRATION OF CHINA'S PESTICIDE INDUSTRY

1.1 Rising labor cost driving enterprises to migrate to low-cost areas

1.2 Increasing environmental protection pressure forcing enterprises to migrate

1.3 Land, energy shortages pushing enterprises to migrate

2 DIRECTION OF CHINA'S PESTICIDE INDUSTRY MIGRATION

2.1 Expansion of China's pesticide enterprises in 2020, by region

2.2 Migration strategy of China's pesticide enterprises in 2020, by construction progress

2.3 Migration scale of China's pesticide enterprises in 2020, by the planning capacity

2.4 China's pesticide enterprises industrial layout in 2020, by product type

3 DYNAMICS OF MIGRATION OF CHINESE PESTICIDE ENTERPRISES IN 2020

3.1 Migration of top 20 pesticide enterprises in China

3.2 Migration of other pesticide enterprises in 2020
