Abstracts

This report is a value chain analysis of the pinene industry in China covering pinene, its raw materials and downstream products, presenting the overall development of the industry in 2010–2015 and the industrial outlook in the following five years and trying to provide a guide for investment.

Pinene is a preliminarily processed product of gum turpentine and can be divided into two types: α -pinene (α -pinene) and β -pinene (β -pinene). During the past few years, the pinene industry has been underperforming in China with falling output and consumption. In particular, the consumption of β -pinene experienced changes from prosperity before 2011 to a downturn afterwards. What had happened to the pinene industry during the five years? How about the performance of the producers? What are the changes in its downstream markets? What will be the future development of the pinene industry? Answers to these questions can be found in this intelligent report.

The key points of this report are listed as below:

Historical production situation of α -pinene and β -pinene in China in 2010–2015 and forecast for 2016

Prices of α -pinene and β -pinene in 2010–July 2016

Imports and exports of pinene in 2010–2015 and detailed analysis for α -pinene and β -pinene in June 2015–May 2016

Consumption of α -pinene and β -pinene in China in 2010–2015 and breakdown by end-use segment

Analysis of factors influencing the development of the pinene industry

Forecast on supply and demand of pinene in China in 2016–2020

Contents

1 SUPPLY

1.1 Production, 2010–2016E

1.2 Producers

2 PRICE TREND, 2010–JULY 2016

2.1 Price, 2010-2016E

2.2 Price, 2015–July 2016

3 IMPORT AND EXPORT, 2010–2015

4 CONSUMPTION, 2010–2016E

4.1 α -pinene

4.1.1 Market size and market share

4.1.2 Brief introduction of major derivatives

4.1.3 Export volume and value, June 2015–May 2016

4.2 β -pinene

4.2.1 Market size and market share

4.2.2 Brief introduction to major derivatives

4.2.3 Export volume and value, June 2015–May 2016

5 BRIEF INTRODUCTION TO SUPPLY OF RAW MATERIALS

6 FORECAST ON INDUSTRY DEVELOPMENT

6.1 Influencing factors

6.2 Outlook, 2016–2020

7 CONCLUSION

List Of Tables

LIST OF TABLES

- Table 1.2-1 Capacity and output of major pinene producers in China, 2014–2015
- Table 3-1 China's exports of pinene by month, 2010–2015
- Table 3-2 China's exports of pinene by destination, 2010–2015
- Table 3-3 China's imports of pinene by month, 2010–2015
- Table 4.1.1-1 Breakdown of market size by apparent consumption and market share of α -pinene in China, 2010–2015
- Table 4.1.2-1 Capacity of major producers of dihydromyrcene/dihydromyrcenol in China, 2015
- Table 4.1.2-2 Capacity of major synthetic camphor producers in China, 2015
- Table 4.1.2-3 Capacity of major producers of synthetic borneol in China, 2015
- Table 4.1.3-1 China's exports of α -pinene by month, June 2015–May 2016
- Table 4.1.3-2 China's exports of α -pinene by destination, June 2015–May 2016
- Table 4.2.1-1 Breakdown of market size by apparent consumption and market share of β -pinene in China, 2010–2015
- Table 4.2.2-1 Capacity of major myrcene producers in China, 2015
- Table 4.2.3-1 China's exports of β -pinene by month, June 2015–May 2016
- Table 4.2.3-2 China's exports of β -pinene by destination, June 2015–May 2016
- Table 5-1 Output of gum turpentine and gum rosin in China, 2010–2015
- Table 5-2 Compositions of different kinds of super-grade gum turpentine in China
