As the natural acid, citric acid industry has seen a fast growth in China before 2008 due to increasing demand from both of overseas market and domestic market. However, in the past five years, China's citric acid production has been expanding slowly due to demand increase very slowly. What's more, the price of citric acid's raw material witnessed the uptrend in the same period. What has happened in the citric market in past five years? How is the current competition structure of citric acid in China? Who are the leading producers now? What is the future relationship between supply and demand in the citric acid market?

With the application of citric acid is quite wide in China due to its long history and natural acid, how is the current competition structure of citric acid in China? And how do citric acid's major downstream industries develop in China? What is the consumption trend?

Besides the aspects mentioned above, the current situation of export and import in citric acid industry also can be seen in this report.

What's more, what will be the development trend of citric acid industry in China? You can find the answers in this report.
