Abstracts

This report is a value chain analysis of the sodium gluconate and glucono-delta-lactone industry in China, which covers the production, major producers, price, production technology and raw material of sodium gluconate and glucono-delta-lactone, presents the overall development of the industry during 2016–2020.

Sodium gluconate (SG), a sodium salt of gluconic acid, is used in concrete additive, water quality steadying agent, food and electroplating detergent industries in China. In addition, glucono-delta-lactone (GDL) is a harmless food additive to human body. During the past two years, these two industries in China with increasing output and consumption.

What had happened to the industries during 2016–2020? How about the performance of the producers? What are the new production technologies? Answers to these questions can be found in this intelligent report.
