### **Abstracts**

This report is the market analysis of major functional oligosaccharides in China, including isomalto-oligosaccharide (IMO), fructo-oligosaccharide (FOS), soybean oligosaccharide (SBOS), galacto-oligosaccharide (GOS), xylo-oligosaccharide (XOS) and trehalose. The report covers the production dynamics of these six products in 2014–2016. Besides, prices of fructo-oligosaccharide and xylo-oligosaccharide are also analyzed in this report.

Functional oligosaccharides are replacing sucrose in food industry in the world. However, the development of this industry was not smooth in China in 2014–2016. What had happened to the functional oligosaccharides industry in China during 2014–2016? How about the production of major functional oligosaccharide producers? Why the ex–works price of functional oligosaccharide products fluctuated significantly in 2015 and 2016? Answers to these questions can be found in this intelligent report.

The key points of this report are listed as below

Annual review of hot spots in China's functional oligosaccharides industry in 2016

Capacity and output of six functional oligosaccharide products in China, 2014–2016

Major producers and distribution of six functional oligosaccharide products in China, 2014–2016
