Abstracts

In 2018–2022, China's glufosinate-ammonium production has been in a fast expansion period, with significant growth in capacity and output. However, the export volume saw fluctuations during this period, with growth slowing down in 2019 and even a large drop in 2020. In 2022, export volume of technical witnessed a remarkable growth.

Hebei Veyong and Ningxia Wynca have new capacities of glufosinate-ammonium TC in 2022. Then what will be the development trend of the relationship between glufosinate-ammonium market's supply and demand in China in the future? And how will the market price of glufosinate-ammonium products in China change in the future?

In this report you will find answers to the questions mentioned above. And the report mainly focuses on the information below.
