China is an important sugar alcohol producer in the world. Generally speaking, Its sugar alcohol industry has witnessed stable development in the past few years. Some producers have been washed out due to profit deficit, while some have expanded production capacity. Through this report, you can find out the latest production situation in China.

With over 50 active producers nationwide, China's total output of sugar alcohols reaches 795,140 tonnes in 2010. Among them, Shandong Tianli Pharmaceutical Co., Ltd., Roquette (China) Co., Ltd., Shandong Futaste Pharmaceutical Co., Ltd., etc. are big producers. What is the latest information about the producers in China? Meanwhile, VC, toothpaste and food are the top three consumption fields in China. So what is the latest consumption pattern of sugar alcohols in China?

Additionally, this report also provides you the latest export situation of sugar alcohols, raw material supply for sugar alcohols, etc. Moreover, in 2011 version, the report will add the competition analysis between sugar alcohols and high intensity sweeteners.

Besides the aspects mentioned above, what other changes in sugar alcohol industry can be seen from 2009 to 2010? What will be the development trend of sugar alcohols industry in China? You can find the answers in this report.

This report combines CCM's expertise in sugar alcohols market research. Highlights of this report are as follows:
