Abstracts

Fipronil is an outstanding insecticide and has played an important role in pest control in China. However, owing to the harmful effect of fipronil on shellfishes and bees, Chinese government has restricted the use of fipronil in China since 1 October 2009. According to CCM International's market survey, almost all fipronil used on rice has been out of the market in China. However, currently, some fipronil producers still have no production licenses and can evade the government's market supervision through name changes of fipronil. Thus, a small amount of fipronil is still used on rice.

It is known that, after Bayer' fipronil patent expired in June 2008, attracted by fipronil's promising market and fat profit, more domestic companies have taken part in fipronil production, though most of them have no production licenses. Under this situation, most fipronil produced by non-license holders is exported through product name changes. In addition, in order to capture more market share, some fipronil producers also have entered animal health segment and built fipronil production lines in South America.

This report focuses on the aspects of production and consumption of fipronil. The following points are clearly addressed in the report:

Production and every fipronil producer in China

Domestic consumption structure and consumption habit of fipronil

Contents

EXECUTIVE SUMMARY

INTRODUCTION AND METHODOLOGY

I Fipronil industry in China

I-1 Registration situation of fipronil

I-2 Summary of fipronil production

I-2.1 Fipronil technical

I-2.2 Fipronil formulation

I-2.3 Key fipronil manufacturers

II Consumption of fipronil in China

II-1 Consumption structure

II-2 Consumption habit in China

List Of Tables

LIST OF TABLES

Table I-1.1 Active fipronil registrations in China, May 2010

Table I-2.1.1 Active producers with registration permit and legitimate production, May 2010

Table I-2.1.2 Production distribution of fipronil technical in China, as of May 2010

Table I-2.3.1 Overview of fipronil producers in China, as of May 2010

Table I-2.3.2 Fipronil producers engaged in animal health segment, 2009

Table II-1.1 Consumption of fipronil technical on major crops, 2009

List Of Figures

LIST OF FIGURES

Figure I-1.1 Number of fipronil registration, 1994-May 2010

Figure I-1.2 Formulation types of active registrations for fipronil, 1994-May 2010

Figure I-2.1.1 Capacity share of fipronil technical producers in China, 2009

Figure I-2.1.2 Output share of fipronil technical producers in China, 2009

Figure I-2.1.3 Output value share of fipronil technical producers in China, 2009

Figure I-2.2.1 Market share of fipronil formulations, 2009

Figure I-2.2.2 Output share of 5% SC producers in China, 2009

Figure II-1.1 Consumption structure of fipronil by technical output in China, 2009

Figure II-1.2 Consumption structure of fipronil by application field in China, 2009
