Abstracts

α -Amylase, the first industrially produced enzyme in China, plays an important role in the nation's enzyme industry. There are three categories of α -amylase on the market: high temperature-resistant α -amylase, medium temperature α -amylase and fungal α -amylase. From 2004 to 2010, the total output of α -amylase in China increased from 17,000 tonnes to 26,000 tonnes. As to the latest production situation of different categories, you can find it in this report.

α -Amylase is widely used in distilled spirit detergent, starch processing, textile, wheat-based products and other fields. This report elaborates the demand for the product in different applications in the past and future. Moreover, it continuously monitors the market price of α -amylase from 2007 to 2011.

Domestic and foreign producers coexist in China's α -amylase market. What's the respective market share of the two parts? How about the production situation of major Chinese producers? You can find the answers in this report.

Your benefit from this report:

Gaining vital business intelligence of China's α -amylase industry before entering the competition;

Understanding the actual production situation, price and, demand for α -amylase in China

Keeping informed of your competitors and their activities in China;

Understanding the future trend of China's α -amylase industry
