Abstracts

Zinc acetate, a common chemical, has large capacity in China, but output is much smaller, as domestic applications haven't been fully expanded.

All the producers express that they can enlarge output according to orders anytime.

Among the dozens of current active zinc acetate producers in China, mostly are domestic enterprises, only one joint venture.

Amid current global financial crisis, zinc acetate's price has declined a lot.

Both import and export are small for zinc acetate, with imported product mostly used by Japanese companies in China.

Aims of this report:

- To provide readers with comprehensive & in-depth understanding on Chinese zinc acetate industry;
- To position Chinese zinc acetate in the world by import and export analysis
- To know the competitive advantage of zinc acetate in Chinese market
- To identify major domestic suppliers
- To discuss and analyze price fluctuations and find out reasons for such fluctuations;
- To reveal current consumption in China, from aspects of product specifications, regional distribution, consumption pattern, major end users;
- To make a forecast on future prospect and find out the opportunities in Chinese market

What can you benefit from the report?
