Abstracts

Glycine, including tech-grade, feed-grade, food-grade and pharmaceutical-grade, is widely used as raw materials for CMC (carboxymethyl cellulose), agrochemicals and surfactant. China is not only a major production base of glycine, but also a large consumer.

Glycine has experienced strong growth momentum over the past few years especially after 2007, seeing a surge in demand at home, which pushes up the product's capacity expansion and output increase.

Along with the capacity growth, the glycine industry is facing many problems, such as overcapacity, backward pollutant treatment. How are the statuses of domestic glycine suppliers? You can find the answer in this report and it serves you in the aspects of identified key players of glycine industry in China.
