Abstracts

Crop planting industry is an important basis of agriculture. Agricultural produces is an important strategic commodity for people's livelihood. And ensuring the supply of agricultural produces is the primary task of agriculture development. In order to guide the development of agriculture in 2014, China's Ministry of Agriculture has proposed 50 concrete measures. In this report, the related policies for crop planting are introduced and they mainly focus on the following aspects:

Price support for agricultural produces

Declining production costs

Prompting agricultural production in large-scale and standardization

Processing and marketing of agricultural produces

Talent cultivation and technical guidance

Ecological and environmental conservation

Except the policy introduction, you can also get an overview of the financial support for agriculture in China in recent years. What's more, the related policies for crop planting have been interpreted with professional perspective.

Overall, China's government will strengthen the support to crop planting, improving the agricultural science and technology and strengthening the construction of the agricultural infrastructure. Crops planting industry will get a lot of advantages in the future and more investment opportunities will turn up.
