Renewable Energy Policy Analysis in Asia

Date:	February 22, 2010
Pages:	83
Price:	US\$ 6,896.56 (The price excludes 8% VAT)
ID:	R98ACD5441FEN

Policies play a key role in the development and utilization of renewable energy industry, especially for the developing countries. Asia's renewable energy industry has witnessed fast-growing development in recent years, but compared to Europe, it is still in its infancy on the whole and related policy mechanisms in various countries of Asia remain to be improved.

Asia's renewable energy development is mainly distributed in the countries and areas of East Asia, South-eastern Asia and South Asia (including China, Japan, India, Korea, Taiwan, Indonesia and Thailand, etc.). As one of the main developed countries in the world, Japan has made significant achievements in renewable energy industry, especially in solar energy and renewable energy technologies.

As the largest developing countries, China is the leading player of renewable energy development in Asia and its growth in renewable energy industry has showed booming momentum in recent years, especially after implementation of Renewable Energy Law and its supporting policies and incentives.

Under the guidance and support of policies and incentives, Asian countries and areas, including India, Indonesia, Thailand and Taiwan, also have obtained obvious achievements and are attaching more importance to the utilization of renewable energy.

CCM carried out an in-depth research on renewable energy policies of above countries. Key issues as follows will be comprehensively presented in this report:

- Interpretation of existing policies and incentives for renewable energy development and utilization and the latest dynamics;
- Essence and issuance motivation of the policies and incentives;
- Background and situation of energy demand and supply;
- Main achievements of renewables development under support of policies;
- Limitation of policy system and specific policies and incentives;
- Forecast on development of renewable energy policies and incentives.

Table of Content

Main content

I OVERVIEW OF RENEWABLE ENERGY INDUSTRY IN ASIA

- I-1 Market situation of Asian renewable energy
- I-2 Roles of policies and incentives in renewable energy development
- I-3 Asian renewable energy policy system
- I-4 Renewable energy policy comparisons in Asia and in Europe

II CHINA'S RENEWABLE ENERGY POLICY ANALYSIS

- II-1 Major policies and incentives by energy
- II-2 Essence of policies and incentives
- II-3 Background of policies introduction

- II-4 Outcome of policies and incentives
- II-5 Limitations of policies and incentives
- II-6 Forecast for renewable energy policies

III INDIA'S RENEWABLE ENERGY POLICY ANALYSIS

- III-1 Major policies and incentives by renewable energy
- III-2 Essence of policies and incentives
- III-3 Background of policies release
- III-4 Outcome of policies and incentives
- III-5 Limitations of policies and incentives
- III-6 Forecast for renewable energy policies

IV JAPAN'S RENEWABLE ENERGY POLICY ANALYSIS

- IV-1 Major policies and incentives
- IV-2 Essence of policies and incentives
- IV-3 Background of policies introduction
- IV-4 Outcome of policies and incentives
- IV-5 Limitations of policies and incentives
- IV-6 Forecast for renewable energy policies

V INDONESIA'S RENEWABLE ENERGY POLICY ANALYSIS

- V-1 Major policies and incentives by energy

LIST OF TABLES

- Table I-1 Existing installed capacity of wind and solar power for the World's top five countries by 2008
- Table II-1 Major policies and incentives for renewable energy in China
- Table II-2 Main applications of special fund for renewable energy development in China
- Table II-3 Pricing mechanism of renewable power in China
- Table II-4 Specific contents of the special fund in China
- Table II-5 Expenditure range of special fund acquired through free financing in China
- Table II-6 Development plans for key renewable energies in China, 2006-2020
- Table II-7 Major development plans of renewable energy in China by 2010
- Table II-8 Key hydropower projects in 11th Five-Year Plan in China
- Table II-9 Key bioenergy projects in 11th Five-Year Plan in China
- Table II-10 Regional distribution of wind power projects in 11th Five-Year Plan in China
- Table II-11 Key projects and distribution of solar power generation in China
- Table II-12 Requirements on transfer efficiency of photovoltaic products in China
- Table II-13 Allocable scope of photovoltaic building subsidy in China
- Table II-14 Standards on three types of PV building projects for subsidy declaration in China
- Table II-15 CGN combination's advantages on this solar power franchise
- Table II-16 Main contents of China's 6 wind power concession projects
- Table II-17 Regulations for biofuel industry in China
- Table II-18 13 laws and regulations based on Renewable Energy Law in China
- Table II-19 Energy consumption level of main energy-using industries in China
- Table II-20 Main achievements of China's bioenergy development by 2008
- Table II-21 Predicted adjustment of renewable energies in RPNE in China
- Table III-1 Industry policies for main renewable energies in India
- Table III-2 Main renewable energy policies by state governments in India
- Table III-3 Main policies for small-scale renewable energy industries in India
- Table III-4 Major functions of NSIC
- Table III-5 Main incentives for investment in RETs in India

Table III-6 Concession under India's Income Tax Rules

Table III-7 Overview of central government incentives for wind power in India

Table III-8 Overview of state government incentives for wind power in India

Table III-9 IEC standards for equipment of SHP projects in India

Table III-10 Buy back of hydropower generation in India

Table III-11 Main Objectives of the Biomass Energy and Co-Generation Programme in India

Table III-12 Foreign investment policies on renewable energy in India

Table III-13 Potential and installed capacity of SHP in India, 31st March 2009

Table IV-1 Objectives for NNES in Japan

Table IV-2 Specific targets of NNES in Japan

Table IV-3 Medium and long-term targets for new energy in Japan

Table IV-4 Key policies for attainment of medium and long-term targets in Japan

Table IV-5 Government policies on wind power in Japan, by 2008

Table IV-6 Subsidy for small and medium-sized hydropower stations in Japan

Table V-1 National Energy Mix 2025 after optimizing BaU Scenario in Indonesia

Table V-2 Biofuel program in Indonesia

Table V-3 Minimum mandatory on biofuel utilization in Indonesia (PERMEN ESDM NO.TAHUN 2008)

Table V-4 Renewable energy development in Indonesia, 2008

Table VI-1 Comparison of Taiwan's RE Development Act and Germany's RE Law

Table VI-2 Short, medium and long-term development plan for renewable energies in Taiwan

Table VI-3 Development targets for renewable energies in Taiwan by 2020

Table VI-4 Current incentives for renewable energy promotion in Taiwan

Table VI-5 Targets for carbon dioxide emission reduction

Table VI-6 Outcome of renewable energy policies and incentives in Taiwan

Table VII-1 Ministerial Regulations for energy conservation in buildings in Thailand

Table VII-2 Ministerial Regulations for energy conservation in machinery, equipment and promotion of energy-efficient materials in Thailand

Table VII-3 Documentations on applying for financial supports in Thailand

Table VII-4 Promotion for E20 gasohol in Thailand, 2008-2011

Table VII-5 Biodiesel for vehicle use in Thailand

Table VII-6 Community biodiesel for agricultural machine use in Thailand

Table VII-7 Biodiesel for vehicle use in Thailand

Table VII-8 Community biodiesel for agricultural machine use in Thailand

Figure VII-1 Original renewable energy target in Thailand, by 2011

Figure VII-2 Accumulative installed capacity of solar cells in Thailand, 2005-2009
Figure VII-3 Biofuel market in Thailand, 2007~2009

COMPANIES MENTIONED

Hebei Donghua Chemical Group
China Petroleum & Chemical Corporation;
China National Petroleum Corporation;
China National Offshore Oil Corporation;
Taiwan Power Company;
Japan Natural Energy Company Limited.
