Abstracts

Seed China News provides you with real-time intelligence on China's seeds market.

It is a monthly published newsletter, which can be downloaded in PDF format. The subscription period is yearly, grants the subscriber 12 issues in total.

China's seed industry is changing rapidly as the government struggles to create an industry ready to compete with the seed giants of the US and Europe. Accelerating M&A, increasing investment in R&D, strengthening new variety rights and the possible relaxation of restrictions on GMO are all trends that could transform the industry.

Seed China News will help you stay ahead of the game in this fast-changing market with real-time reporting on everything affecting China's seed market, from new research to fluctuations in the grain markets. This includes:

Breaking news from China and abroad

The latest market data, including price information, import/export data, production, consumption, operating rates, etc.

In-depth analysis of market trends, Chinese government policy, the performance of leading Chinese producers, M&A, new technologies, and more

Expert commentary from industry insiders, including regular guest articles and interviews with insiders at leading Chinese manufacturers, associations and government organizations

HEADLINE

The Department of Agriculture and Rural Affairs of Heilongjiang Province adhered to the five measures to keep the grain production stable, and spring sowing in the Province has started, laying a solid foundation for grain harvest in 2021.

The MOA issued a notice in mid-May, requiring local governments to pay efforts in field management and disaster prevention to ensure summer grain harvest. It was reported that the high-incidence season for convective weather has arrived in China, affected by the superimposed impacts from warm and humid air from the south and dry and cold air in upper trough. For the sake of ensuring harvest, MOA gave guidance from 5 perspectives such as strengthening responsibility shouldered, monitoring and pre-warning, field management, disaster prevention and relief and cross-regional mechanical harvest.

On 14 May, the NATESC held the 2021 national online meeting on summer harvest and soil moisture. According to the consultation, the soil moisture in most agricultural areas of China is moderately good, which is generally conducive to wheat flowering and filling, fruit-bearing of rape and autumn crop sowing and transplanting.

Long Ping High-Tech achieved an operating revenue of USD474.93 million in 2020, an increase of 5.14% over the same period of last year; The net profit was USD33.54 million, an increase of 228.78% YoY. The operating cash flow improved significantly, of which the net cash flow from operating activities reached USD197.05 million, up 1,400.58% YoY, turning loss into gain in profit. Its main business has developed steadily in an all-round way, and the industrial advantages have been further consolidated.

As of 21 May, Beidahuang Group has completed rice transplanting in more than 9.31 million ha of ares with high standard, quality and efficiency. Sowing on more than 8.09 million ha of dry land has also been completed on 19 May, which marked the success of the spring cultivation campaign of more than 17.69 million ha of grain crops of Beidahuang Group, which laid a solid foundation for realizing the goal of 21.5 million tons of total grain output in the whole year.

On 3 May, Heilongjiang Province issued the Opinions on Strengthening the Protection and Utilization of Agricultural Germplasm Resources to strengthen the effective protection and promote efficient utilization of agricultural germplasm resources. Agricultural germplasm resources are strategic resources to ensure national food security and supply important agricultural products. And it is an irreplaceable material basis for the original innovation of agricultural science and technology and the

development of modern seed industry.

On 10 May, 2021, the Seed Industry Management Department of the Ministry of Agriculture and Rural Affairs publicized 324 varieties of main crops approved by Jilin Province in 2021, including 236 corn varieties, 69 rice varieties, 32 soybean varieties and 3 wheat varieties.

On 10 May, 2021, the Seed Industry Management Department of the Ministry of Agriculture and Rural Affairs announced the main crop varieties approved in Henan Province in 2021, including 118 varieties. On 10 May, 2021, the Seed Industry Management Department of the Ministry of Agriculture and Rural Affairs publicized the 324 main crop varieties approved by Guangxi in 2021, including 223 rice varieties, 94 corn varieties and 7 soybean varieties.
