Chlorpyrifos is a broad-spectrum organophosphorus insecticide in China with sales volume ranking first among all organophosphorus insecticides worldwide at present. China's chlorpyrifos industry has witnessed remarkable progress since the first registration of chlorpyrifos technical came out and approved in early 1990s. Thanks to the advanced production technology of STCP production, China's chlorpyrifos industry has seen notable changes, especially in recent 4-5 years. Now, China has been the globally largest production base (by capacity) of chlorpyrifos technical, and it will surely capture a more considerable market share in the global market.

Under the backdrop of Chinese government's rising awareness of environmental protection, pesticide industrial reconstruction, challenges from global financial crisis and RMB appreciation, what's the development trend for China's chlorpyrifos industry?
