Abstracts

Electronic hydrogen fluoride is one of the indispensable key materials in solar photovoltaic, flat panel display and semiconductor manufacturing process.

China's electronic hydrogen fluoride industry started late but has developed rapidly. At present, electronic hydrogen fluoride is in short supply in China, the capacity of electronic hydrogen fluoride is mainly concentrated in low and medium-end products, and high-end products still have a large room for import substitution.

With increasing transfer of global semiconductor manufacturing capacity to China, semiconductor industry has grown rapidly here. Expanding demand from semiconductors as well as solar photovoltaics, flat panel displays and other fields will promote fast growth of the electronic hydrogen fluoride industry in China. Driven by strong market demand, electronic hydrogen fluoride will enjoy broader space for development.

The report provides you with detailed information of electronic hydrogen fluoride industry in China, including major manufacturers, capacity, price analysis, export analysis, supply and demand, future forecasts and so on.

This report is based on data collected via diverse sources. The primary sources include interviews with industry experts, key players of electronic hydrogen fluoride. Various secondary sources include published magazines, journals, government statistics and CCM's database, etc. Data obtained from various sources have been combined and cross-checked to ensure that this report is as accurate and methodologically sound as possible.
