Abstracts

By analysing the major changes, factors behind the changes and their future trends, CCM's report of Survey of Fluorohydrocarbon in China not only reveals the production and market situation of China's fluorine refrigerant including capacity, output, consumption and etc. in the recent years, but also provides forecasts to their future development in next few years.

Fluorohydrocarbon is used in various industries such as refrigerant, foam beater, extinguishant, insecticide, medical and chemical. Among them, the refrigerant industry shares the largest consumption of fluorohydrocarbon. Refrigerants are mainly used in household refrigerators, automobiles, marine and household air conditioners, commercial refrigeration equipment, etc., and they can be used not only in producing new equipment, but also in maintenance. Currently, the refrigerants replacement is being constantly accelerated in China.

At present, the main fluorine refrigerants in China are HCFC-22, HFC-134a, HFC-32, HFC-125 and HFC-410a. What have happened to them during the past few years? How their prices changed? How about the performance of the producers? What will be the future development trend of fluorine refrigerants?

Answers to these questions can be found in this intelligent report. The key points of this report are listed as below:

Production, consumption, export and price of HCFCs (HCFC-22) in China (production and consumption in H1 2020, price in 2016–H1 2020).

Situation of HFCs in China, including HFC-134a, HFC-32, HFC-125 and HFC-410a (production and consumption in H1 2020, price in 2016–H1 2020).

Development trend of fluorohydrocarbon in China.

Forecast on demand for the main fluorine refrigerants in China.

Contents

Executive summary

Introduction and methodology

1 DEVELOPMENT OF FLUOROHYDROCARBON

1.1 Overview of fluorohydrocarbon industry in China

1.1.1 Overview of HCFCs in China

1.1.2 Overview of HFCs in China

1.2 Production and market situation of major products

1.2.1 HCFC-22

1.2.1.1 Price

1.2.1.2 Export

1.2.1.3 Consumption

1.2.2 Situation of HFC-134a

1.2.3 Situation of HFC-32

1.2.4 Situation of HFC-125

1.2.5 Situation of HFC-410a

1.2.6 Situation of other major products

1.3 Development trend

2 FORECAST

3 CONCLUSIONS
