Abstracts

This report aims to study China's hydrazine hydrate market, focusing on manufacturing processes, cost of production and existing manufacturers. Currently, there are mainly three hydrazine hydrate (HHZ) production methods in the world, namely urea process, Bayer ketazine process and peroxide process. Then which technology is taken by the majority of producers in China? What had happened to China's hydrazine hydrate market during 2017–2019? How about the performance of the producers?

Answers to these questions can be found in this intelligent report.

The key points of this report are listed as below:

Existing technology and equipment in China;

Capacity and output of hydrazine hydrate in China, 2017–2019;

Price of hydrazine hydrate and influencing factors in China;

Cost analysis of hydrazine hydrate production;

Consumption analysis of hydrazine hydrate in China;

Profile of key hydrazine hydrate producers in China.
