Abstracts

This report is a value analysis of the inorganic fluoride industry in China, which covers the production, price, imports & exports of main inorganic fluoride products. Besides, forecast on the development trend of these products are analysed in this report.

Fluorine chemical industry has been one of the fastest developing and most promising chemical industries in China. China has become one of the largest countries of fluorine chemical production and consumption. At present, great progress has been made in the research and development of inorganic fluorides in China. Inorganic fluorides have been widely used in chemical, mechanical, optical instrument, electronic and medical fields and have become important chemical products in the national economy.

This report is based on data collected via diverse sources. The primary sources include interviews with industrial experts, key players in inorganic fluoride production. Various secondary sources include published magazines, journals, government statistics and CCM's database, etc. Data obtained from various sources have been combined and cross-checked to ensure that this report is as accurate and methodologically sound as possible.

Major producers of inorganic fluorides have been given and studied in the report. Major producers include Dongyue Group, Do- Fluoride, Zhejiang Juhua, Zhejiang Sanmei, Zhejiang Yonghe, etc.
