Abstracts

Description:

Thanks to the government policies and the strong domestic demand, fluorine chemical industry has been one of the fastest developing and most promising chemical industries in China. China had become one of the largest fluorine chemical production and consumption areas. Fluoropolymer, inorganic fluorides, refrigerant and organic-intermediates are 4 main important sectors for China's fluorine chemical industry.

Fluorine chemical products are widely applied in many fields. Two of the major applications of fluoropolymer are: fluororubber and fluororesins. To figure out the detailed and accurate fluoropolymer situation in China in the past years and to make a forecast in the coming five years to better development, the report focuses on the following points:

Overview of fluororesins and fluororubber industry in China

Introduction of different techniques of fluororesins and fluororubber and the trend of the Polymerization technique

Market of fluororesins and fluororubber in China

Import and export analysis of fluorite and common fluoride

Contents

1 REFRIGERANT

- 1.1 Overview of refrigerant industry in China
- 1.2 Production status of fluor-refrigerant industry in China
- 1.3 Development trend

COMPANIES MENTIONED

Dongyue Group Ltd., Juhua Group Corporation, Jiangsu Meilan Chemical Group Co., Ltd., Changshu 3F Fluorochemical Industry Co., Ltd., Zhejiang Yonghe New Type Refrigerant Co., Ltd.
