Abstracts

Description: China is rich in fluorite resource. Driven by domestic and overseas demand for fluorine chemicals, fluorine chemical industry has been one of the fastest developing and most promising chemical industries in China. On the other hand, China had become one of the largest fluorine chemical production and consumption areas. A high proportion of the downstream products is for export.

In 2010, China is the largest holder of proven reserves of fluorite and the third largest technical reserves of fluorite in the world. With the rapid development of the industry and its downstream products, fluorite resource is over-exploited in recent years . In order to get a panoramic view on fluorine industry in the past five years and to make a forecast in the coming five years, this report analyzes the supply situation and price trend, reserve, industry chain, influencing factors, key producers, current technique and future commercial opportunities in this industry.

EXECUTIVE SUMMARY

METHODOLOGY

I OVERVIEW OF CHINESE FUNGICIDE INDUSTRY

II MANCOZEB

III CARBENDAZIM

IV CHLOROTHALONIL

V THIOPHANATE METHYL

VI TEBUCONAZOLE

VII TRIADIMEFON

VIII PROCHLORAZ

IX OTHER FUNGICIDES

IX-1 Propiconazole

IX-2 Difenoconazole

IX-3 Phosethyl Al

IX-4 Dimethomorph
