Key findings (Word) + Trade analysis (Excel)

As a fine chemical with wide application range, levulinic acid is mainly used in the fields of medicine, food, printing ink, plastics, plasticiser, electronic products, flavor, etc, but most of the application industries haven't be explored in China currently.

China has been producing levulinic acid for several years, but it has very few such producers at present. In order to provide a completed picture for levulinic acid in China, this report has described the overall production, raw materials, price, consumption, major end users and export of levulinic acid. Besides, the active manufacturers and end users are listed.

In this report, you can easily find out:

- the current production status of levulinic acid in China;
- what is the difference of LA export between H1 2008 and H2 2008, and what's the influencing factor?
- who may be your competitors?
- who may be your potential business partners?
- who may be your potential clients?
- which countries consume levulinic acid?
