Abstracts

The CFSA seeks opinions on the new food additives: steviol glycosides from fermentation, 2'-FL and LNT and on expanding the use of cyclamate and stevioside.

Newtrend, an amino acid and sucralose manufacturer owning three factories in China and two overseas factories, plans to list on the Hong Kong Stock Exchange.

The documents on the inspection and acceptance of the first phase of Henan Jinyufeng's "Big Health Bio-Industrial Park project" were made public in late June.

Two allulose-related projects of Anhui Jinhe moved forward in July.

Jiangsu OGO plans to produce new products, isomaltulose and inositol.

Nantong Changhai intends to retrofit the existing facilities to produce isomaltulose, isomalt, L-alanine, and inositol.

The EI report of BLB's "2,500 t/a HMOs project" was accepted and publicised by the local authority on 2 July.

Futaste Pharma plans two projects for capacity expansion of xylose, L-arabinose, maltitol, and other products.

The price of glucose monohydrate in China remained robust in early to mid-July, primarily underpinned by rising raw material costs and a moderation in supply-demand tensions. However, the price fell later this month amid the weakening demand and lower costs, despite a slight reduction in supply.

In H1 2024, China's sweetener exports (including five artificial sweeteners, three sugar alcohols, and three liquid starch sugar) are performing well, with the half-yearly export value constituting 52.6% of the 2023 full-year value.
