Abstracts

This report is the seventh edition of the titanium dioxide series reports, published by CCM.

Undoubtly, China is the biggest country both in titanium dioxide production and consumption.

Nevertheless, along with tremendous growth in the past few years, the limitations are more and more obvious, coming from technology, product quality and environmental protection. Technology of chloride process in China is still poor and the core technology is monopolized by overseas enterprises. How do domestic enterprises develop the chloride process? In order to raise the product quality, what are they endeavoring to. As the pressure from environment becomes harder and harder, how do they handle their three waste treatment?

Thus, focusing on such spots, we have done broadly investigation and deeply analysis, and try to find out how Chinese enterprises overcome the obstacles and how the titanium dioxide industry will evolve in the near future. After a great deal of work, we have accumulated full-scale of information of the titanium dioxide industry and made some valuable conclusions. So by reading this report, you will come to know:

Production situation of titanium dioxide in China

Stocks supply of titanium dioxide in China

Market situation of titanium dioxide in China

Enterprises dynamics in China, 2011-2012

Latest trend of Chinese titanium dioxide international trade, 2010-2012

Policy & legislation in China

Development of titanium dioxide industry in the future

Development of chloride process

Forecast on supply and demand of titanium dioxide in China, 2013-2017

Investment opportunity in titanium dioxide industry

Contents

Executive Summary

Methodology

Brief introduction to the development history of toluene in China

Brief introduction to toluene production technology

Global toluene production and consumption

Overview of global toluene market in 2006

Toluene production and consumption in China

- Toluene production in China
- Toluene consumption in China
- Introduction to the market situation of toluene related industries: international crude oil, benzene, paraxylene and TDI
- List of some major end users

Import & export analysis in the recent three years

Pricing of toluene in the past years

Factors for the price changes

Key factors and driven forces for the development of toluene in China

Future forecast on toluene in 2007

Conclusion & suggestion

Appendix: Review of great events in 2006 concerning toluene

COMPANIES MENTIONED

Shanghai Secco, Jiangsu Yangzi BASF, Zhejiang Zhenhai Refinery, Wuhan Petrochemical, Guangdong CNOOC Shell
