Size of different patient segments in a disease area

Population based: disease occurrence, co-morbidities and treatment patterns

Geographic - Regional - Ethnic differences

Along with the epidemiological data, the report also includes:

Disease overview, causes, symptoms, classification, risk factor,  
pathophysiology, diagnosis and treatment

Patient treatment journey

Treatment algorithm and guidelines

Assesses the disease risk and burden

Highlights the unmet needs

Market driver and barrier

Growth opportunities and market trend analysis

## Methodology

This report is built using data and information sourced from proprietary databases, primary and secondary research and in-house Epidemiology Forecast model analysis by a team of industry experts.

To generate accurate patient population estimates, utilizes a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies.

All of the sources used to generate the data and analysis have been identified in the report.

**Note:** Systematic review of the epidemiological literature is also provided for full transparency into research and methods. This report can be delivered to the clients within 4-5 business days.
