SUMMARY

The Global Cancer Monoclonal Antibody Partnering Terms and Agreements 2016-2023 report provides comprehensive understanding and unprecedented access to the cancer monoclonal antibody partnering deals and agreements entered into by the worlds leading healthcare companies

DESCRIPTION

The Global Cancer Monoclonal Antibody Partnering Terms and Agreements 2016-2023 report provides an understanding and access to the cancer monoclonal antibody partnering deals and agreements entered into by the worlds leading healthcare companies.

Trends in cancer monoclonal antibody partnering deals

Most active companies in cancer monoclonal antibody partnering

Disclosed headlines, upfronts, milestones and royalties by stage of development

Cancer monoclonal antibody partnering contract documents

Top cancer monoclonal antibody deals by value

This report provides details of the latest cancer monoclonal antibody agreements announced in the healthcare sectors.

This report provides details of the latest antibody agreements announced in the healthcare sectors, covering:

Monoclonal antibodies

Murine mAb

Chimeric mAb

Humanized mAb

Human aAb

Understanding the flexibility of a prospective partner's negotiated deals terms provides critical insight into the negotiation process in terms of what you can expect to achieve during the negotiation of terms. Whilst many smaller companies will be seeking details of the payments clauses, the devil is in the detail in terms of how payments are triggered – contract documents provide this insight where press releases and databases do not.

This report contains a comprehensive listing of all cancer monoclonal antibody partnering deals announced since Jan 2016, including financial terms where available, including links to online deal records of actual cancer monoclonal antibody partnering deals as disclosed by the deal parties. In addition, where available, records include contract documents as submitted to the Securities Exchange Commission by companies and their partners.

The initial chapters of this report provide an orientation of cancer monoclonal antibody dealmaking and business activities. Chapter 1 provides an introduction to the report, whilst chapter 2 provides an overview of the trends in cancer monoclonal antibody dealmaking since 2016, including details of average headline, upfront, milestone and royalty terms.

Chapter 3 provides a review of the leading cancer monoclonal antibody deals since 2016. Deals are listed by headline value, signed by big pharma, most active cancer monoclonal antibody dealmaking companies. Where the deal has an agreement contract published at the SEC a link provides online access to the contract.

Chapter 4 provides a comprehensive listing of the top 25 most active companies in cancer monoclonal antibody dealmaking with a brief summary followed by a comprehensive listing of cancer monoclonal antibody deals, as well as contract documents available in the public domain. Where available, each deal title links via Weblink to an online version of the actual contract document, providing easy access to each contract document on demand.

Chapter 5 provides a comprehensive and detailed review of cancer monoclonal antibody partnering deals signed and announced since Jan 2016, where a contract document is available in the public domain. The chapter is organized by company A-Z, deal type (collaborative R&D, co-promotion, licensing etc), and specific therapy focus. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

Chapter 6 provides a comprehensive and detailed review of cancer monoclonal antibody partnering deals signed and announced since Jan 2016. The chapter is organized by specific cancer monoclonal antibody technology type in focus. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

In addition, a comprehensive appendix is provided organized by cancer monoclonal antibody partnering company A-Z, deal type definitions and cancer monoclonal antibody partnering agreements example. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

The report also includes numerous tables and figures that illustrate the trends and activities in cancer monoclonal antibody partnering and dealmaking since 2016.

In conclusion, this report provides everything a prospective dealmaker needs to know about partnering in the research, development and commercialization of cancer monoclonal antibody technologies and products.

Key benefits

Global Cancer Monoclonal Antibody Partnering Terms & Agreements provides the reader with the following key benefits:

- In-depth understanding of cancer monoclonal antibody deal trends since 2016
- Access to headline, upfront, milestone and royalty data
- Comprehensive access to over 600 actual cancer monoclonal antibody deals entered into by the world's biopharma companies
- Identify most active companies in cancer monoclonal antibody partnering
- Insight into the terms included in a cancer monoclonal antibody agreement

Understand the key deal terms companies have agreed in previous deals
Undertake due diligence to assess suitability of your proposed deal terms for partner companies
Spot the emerging companies in the cancer monoclonal antibody area

Report scope

Global Cancer Monoclonal Antibody Partnering Terms & Agreements is intended to provide the reader with an in-depth understanding and access to cancer monoclonal antibody trends and structure of deals entered into by leading companies worldwide.

Cancer Monoclonal Antibody Partnering Terms & Agreements includes:

Trends in cancer monoclonal antibody dealmaking in the biopharma industry since 2016
Access to headline, upfront, milestone and royalty data
Access to over 600 cancer monoclonal antibody deal records
The leading cancer monoclonal antibody deals by value since 2016

In Cancer Monoclonal Antibody Partnering Terms & Agreements, the available deals are listed by:

Company A-Z
Headline value
Stage of development at signing
Deal component type
Specific oncology therapy target
Monoclonal antibody type

Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

The Cancer Monoclonal Antibody Partnering Terms & Agreements report provides comprehensive access to available deals and contract documents for over 600 cancer monoclonal antibody deals. Analyzing actual contract agreements allows assessment of the following:

What are the precise rights granted or optioned?
What is actually granted by the agreement to the partner company?

What exclusivity is granted?
