SUMMARY

The Clinical Stage Partnering Terms and Agreements in Pharma and Biotech 2016-2023 provides comprehensive understanding and unprecedented access to clinical stage partnering agreements entered into by the worlds leading biopharma companies

DESCRIPTION

The Global Clinical Stage Partnering Terms and Agreements in Pharma and Biotech 2016-2023 report provides a detailed understanding and analysis of how and why companies enter clinical stage partnering deals and provides details of the latest clinical agreements announced in the healthcare sector.

Understanding the flexibility of a prospective partner's negotiated deals terms provides critical insight into the negotiation process in terms of what you can expect to achieve during the negotiation of terms. Whilst many smaller companies will be seeking details of the payments clauses, the devil is in the detail in terms of how payments are triggered – contract documents provide this insight where press releases and databases do not.

This report contains a comprehensive listing of over 2,900 clinical stage partnering deals announced since 2016 including financial terms where available including numerous links to online deal records of actual clinical partnering deals as disclosed by the deal parties. In addition, where available, records include contract documents as submitted to the Securities Exchange Commission by companies and their partners.

The initial chapters of this report provide an orientation of clinical stage deal making and business activities. Chapter 1 provides an introduction to the report, whilst chapter 2 provides an overview of why companies partner clinical stage compounds/products.

Chapter 3 provides an overview of clinical stage deals strategy and deal structure including numerous case studies. Chapter 4 provides an overview of the various payment strategies used in clinical stage deals.

Chapter 5 provides a review of clinical stage deal making since 2016. Deals activity is reviewed by year, stage of development at signing, therapeutic area, technology type, as well as most active dealmakers.

Chapter 6 provides a detailed analysis of clinical stage payment terms including headline, upfront, milestone and royalty rates for phase I, phase II and phase III deals.

Chapter 7 provides a review of the leading clinical stage deal by headline value. Each deal title links via Current Agreements deals and alliances database to an online version of the full deal record, and where available, the actual contract document, providing easy access to each deal record on demand.

Chapter 8 provides a comprehensive listing of the top 25 most active clinical stage dealmaker companies. Each deal title links via Current Agreements deals and alliances database to an online version of the full deal record, and where available, the actual contract document, providing easy access to each deal record on demand.

Chapter 9 provides a comprehensive and detailed review of clinical stage partnering deals signed and announced since 2016, where a contract document is available in the public domain.

Chapter 10 provides a comprehensive directory of clinical stage partnering deals since 2016 organized by stage of development – phase I, phase II and phase III.

The report includes deals announced by hundreds of life science companies including big pharma such as Abbott, Abbvie, Actavis, Amgen, Astellas, AstraZeneca, Baxter, Bayer, Biogen Idec, BMS, Celgene, Eisai, Eli Lilly, Gilead, GSK, J&J, Kyowa Hakko, Merck, Mitsubishi, Mylan, Novartis, Pfizer, Roche, Sanofi, Shire, Takeda, Teva, and Valeant, amongst many others.

The report also includes numerous tables and figures that illustrate the trends and activities in clinical stage partnering and deal making since 2016.

In addition, a comprehensive appendix of all clinical stage deals since 2016 is provided organized by partnering company A-Z, deal type, therapy focus and technology type. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

In conclusion, this report provides everything a prospective dealmaker needs to know about partnering in the research, development and commercialization of clinical stage products and compounds.
