## Abstracts

### SUMMARY

Global Medical Device Partnering Terms and Agreements 2016-2023 report provides a detailed understanding and analysis of how and why companies enter medical device partnering deals

### DESCRIPTION

Global Medical Device Partnering Terms and Agreements 2016-2023 report provides a detailed understanding and analysis of how and why companies enter medical device partnering deals.

This report provides details of the latest medical device agreements announced in the life sciences since 2016.

The report takes the reader through a comprehensive review medical device deal trends, key players, top deal values, as well as deal financials, allowing the understanding of how, why and under what terms, companies are entering medical device partnering deals.

The report presents financial deal term values for medical device deals, listing by headline value, upfront payments, milestone payments and royalties, enabling readers to analyse and benchmark the financial value of deals.

The middle section of the report explores the leading dealmakers in the medical device partnering field; both the leading deal values and most active medical device dealmaker

companies are reported allowing the reader to see who is succeeding in this dynamic dealmaking market.

One of the key highlights of the report is that over 1,700 online deal records of actual medical device deals, as disclosed by the deal parties, are included towards the end of the report in a directory format – by company A-Z, stage of development, deal type, therapy focus, and technology type - that is easy to reference. Each deal record in the report links via Weblink to an online version of the deal.

In addition, where available, records include contract documents as submitted to the Securities Exchange Commission by companies and their partners. Whilst many companies will be seeking details of the payment clauses, the devil is in the detail in terms of how payments are triggered – contract documents provide this insight where press releases and databases do not.

The initial chapters of this report provide an orientation of medical device dealmaking. Chapter 1 provides an introduction to the report, whilst chapter 2 provides an overview of the trends in medical device dealmaking since 2016, including details of headline, upfront, milestone and royalty terms.

Chapter 3 provides a review of the leading medical device deals since 2016. Deals are listed by headline value. Where the deal has an agreement contract published at the SEC a link provides online access to the contract.

Chapter 4 provides a comprehensive listing of the top 25 most active companies in medical device dealmaking with a brief summary followed by a comprehensive listing of medical device deals announded by that company, as well as contract documents, where available.

Chapter 5 provides a comprehensive and detailed review of medical device partnering deals signed and announced since Jan 2016, where a contract document is available in the public domain. Each deal title links via Weblink to an online version of the deal record and contract document, providing easy access to each contract document on demand.

Chapter 6 provides a comprehensive and detailed review of medical device partnering deals signed and announced since Jan 2016. The chapter is organized by specific technology type. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each deal on

demand.

A comprehensive series of appendices is provided organized by medical device partnering company A-Z, stage of development, deal type, and therapy focus. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each deal on demand.

The report also includes numerous tables and figures that illustrate the trends and activities in medical device partnering and dealmaking since 2016.

In conclusion, this report provides everything a prospective dealmaker needs to know about partnering in the research, development and commercialization of medical device technologies and products.

#### Key benefits
