## Executive Summary

The eyewear refers to the range of products that are meant to be worn on eyes for varying purposes. The eyewear products include spectacles, eyeglasses, contact lenses, reading glasses and sunglasses. The 3D glasses are also a part of eyewear product. The eyewear items are worn as a fashion accessory or out of necessity on prescription of optician.

The eyewear items are traded through multiple channels such as stationary (physical) shops/ stores, online stores and multi-channel stores. The eyewear items can be segmented into two broad categories: spectacles and contact lenses. The spectacles can further be classified into single vision lenses, multi-focals, sunglasses, reading glasses, etc. The contact lenses can be further be segregated into soft contact lenses and rigid contact lenses.

The projections are made that the German eyewear market would rise in the forecasted period i.e. 2016-2020 tremendously. The German eyewear market is expected to increase due to growth in demand for multi-focal lenses, increasing population with myopia, increasing percentage of electronic devices in households, increasing aging German population and rising Germany GDP and optical market, etc. Yet the market faces some challenges such as, illegal use of decorative lenses, increasing use of refractive surgery, and lagging behind of German contact lens market.
