## **Abstracts**

The global 3D woven fabrics market was valued at US\$117.89 million in 2022. The market value is expected to reach US\$237.31 million by 2028. 3D woven fabrics refer to textile structures formed by interlacing three sets of yarns, allowing them to be visible in three dimensions: length, width, and depth. Unlike conventional 2D textiles, these fabrics are distinguished by their inherent thickness and enhanced mechanical properties, attributed to the z-yarns running perpendicular to the fabric's surface.

In the coming years, the 3D woven fabrics market is expected to grow further due to increasing demand in emerging sectors like medical textiles, protective gear, and even fashion, where these fabrics are being used for their unique aesthetic and functional properties. As awareness of the environmental impact of traditional manufacturing processes continues to rise, the market is likely to see greater interest in sustainable, innovative solutions, further propelling the growth of 3D woven fabrics in the coming years. This trend, along with ongoing technological advancements and a broader acceptance of these materials across industries, positions the 3D woven fabrics market for sustained and robust growth in the future. The market is expected to grow at a CAGR of approx. 14% during the forecasted period of 2023-2028.

Market Segmentation Analysis:

**By Product Type:** The report provides the bifurcation of the market into four product types: Solid, Hollow, Shell, and Nodal. The solid segment held the highest share of the market. The demand for solid 3D woven fabrics is growing due to their ability to provide unmatched structural integrity, reducing the need for multiple layers of traditional 2D fabrics. On the other hand, the demand for hollow 3D woven fabrics is rising because of their ability to provide lightweight thermal protection, reducing energy consumption and enhancing the efficiency of various systems.

**By Fiber Type:** The report analyzes the 3D woven fabrics market based on the following fiber types: Carbon Fiber, Glass Fiber, and Others. Carbon fiber held the highest share in the market and is expected to be the fastest-growing segment in the forecasted period. Carbon fibers are known for their exceptional strength-to-weight ratio and high stiffness. They are in demand across various industries, particularly in aerospace, automotive, and sports equipment manufacturing. The growth in demand for carbon fiber 3D woven fabrics is driven by their ability to provide lightweight yet incredibly strong materials. In aerospace, for example, these fabrics are used in aircraft components to reduce weight and improve fuel efficiency.

**By End-Use:** The report provides a glimpse of the market based on end-users: Aircraft, Transportation, Building & Construction, and Others. Aircraft held the highest share in the market. 3D woven fabrics are used in the construction of aircraft components like wings, fuselages, and tail sections to provide the necessary strength while minimizing weight. As the aviation industry continues to focus on fuel efficiency, carbon emissions reduction, and the development of lightweight aircraft, the demand for 3D woven fabrics in aircraft applications is steadily growing.

**By Region:** The report provides insight into the 3D woven fabrics market based on the regions namely, Europe, North America, Asia Pacific, Latin America, and the Middle East & Africa. Europe held the major share of the market in 2022. The UK has been actively promoting sustainability and environmentally friendly practices. For instance, the Streamlined Energy and Carbon Reporting Regulation (SECR) makes it mandatory for large businesses in the UK to annually report on their energy and carbon emissions as well as any efficiency measures. As part of this scheme, companies are encouraged to adopt more sustainable practices and reduce their carbon footprint. The focus on reducing carbon footprints and enhancing resource efficiency has led to an increased demand for sustainable materials, including 3D woven fabrics.

According to Zippia, the total value of the US car and automobile manufacturing market is US\$104.1 billion in 2023. The growing automotive sector has embraced 3D woven

fabrics to enhance fuel efficiency, reduce emissions, and improve vehicle safety. These fabrics are employed in the production of lightweight components, such as car body panels and interiors. Hence, as the automotive sector is growing in the US, the demand for 3D woven fabrics has also been increasing.

The growing interest in renewable energy sources has led to the expansion of the wind energy sector in China. For instance, according to Fitch Ratings, the robust growth in renewable-capacity installations would continue in China, supported by energy transition needs and decreasing project costs. As the Chinese government continues to support clean energy initiatives, the demand for 3D woven fabrics is expected to rise in the region.

#### Market Dynamics:

**Growth Drivers:** The global 3D woven fabrics market growth is predicted to be supported by numerous growth drivers such as escalating use in medical industry, increasing adoption of renewable energy sources, growing air passenger traffic, rising electric car sales, growing construction industry, growing demand for carbon fibers, favorable government regulations and standards, and many other factors. Renewable energy technologies, such as wind turbines and solar panels, rely on materials that are not only strong and durable but also lightweight. 3D woven fabrics offer an ideal solution for manufacturing components in these systems, as they provide a high strength-to-weight ratio, enabling more efficient and cost-effective renewable energy infrastructure. In the wind energy sector, for instance, 3D woven fabrics are used to reinforce the blades of wind turbines, making them more robust and lightweight. This, in turn, increases the efficiency and lifespan of the turbines.

**Challenges:** However, the market growth would be negatively impacted by various challenges such as increasing raw material prices, technological limitations in manufacturing and utilization, etc.

**Trends:** The market is projected to grow at a fast pace during the forecast period, due to various latest trends such as advancements in manufacturing and weaving technologies, increasing application in defense industry, customization and versatility, research & development, development of sustainable 3D woven fabrics, etc. The development of sustainable 3D woven fabrics is anticipated to play a significant role in the market growth of these advanced textiles. As environmental concerns and sustainability become increasingly important in various industries, including automotive, construction, and aerospace, the demand for eco-friendly materials is on the rise.

Sustainable 3D woven fabrics are designed with a focus on minimizing their environmental footprint throughout their entire lifecycle, from production to disposal.

#### Impact Analysis of COVID-19 and Way Forward:

The COVID-19 pandemic had a negative impact on the global 3D woven fabrics market. Initially, the COVID-19 pandemic dealt significant blows to the global 3D woven fabric market, disrupting supply chains, halting production, and altering consumer preferences. Yet, as the world transitions to a post-pandemic era, the industry shows signs of resilience and recovery, particularly in sectors valuing lightweight and high-strength materials. Moreover, as the pandemic emphasized the vulnerabilities of manual operations, there's an expected surge in investments in digital and automated manufacturing processes to mitigate future disruptions. Furthermore, there could be an increase in R&D investments to diversify the application of 3D woven fabrics, tapping into industries or areas less impacted by such global disruptions.

#### Competitive Landscape:

The global 3D woven fabrics market is consolidated. The key players in the global 3D woven fabrics market are:

Textum OPCO LLC

Tex Tech Industries

Sigmatex Ltd.

Cristex Composite Materials

China Beihai Fiberglass Co Ltd.

Topweaving New Material Tech Co., Ltd.

U-Long High-Tech Textile Co., Ltd.

3D Weaving SaRL

Tantra Composite Technologies

Recent collaborations between companies, research entities, and academic institutions are reshaping the 3D woven fabrics industry. These partnerships aim to innovate materials and techniques, propelling the market's growth. Moreover, in June 2022, Textum OPCO LLC announced that the company would open new production facility in Miami Township. A nearly US\$5 million manufacturing facility would begin making carbon-carbon composites in Miami Township. On the other hand, Tex-Tech Industries, a manufacturer of specialty textiles, would invest more than US\$24.8 million to build a new manufacturing center in Winston-Salem. Tex-Tech would increase the company's manufacturing operations with a new 170,000-square-foot building.

## Contents

### 1. EXECUTIVE SUMMARY

### 2. INTRODUCTION

#### 2.1 3D Woven Fabrics: An Overview

##### 2.1.1 Definition of 3D Woven Fabrics

##### 2.1.2 Material Advantages of 3D Woven Fabrics

#### 2.2 3D Woven Fabrics Segmentation: An Overview

##### 2.2.1 3D Woven Fabrics Segmentation

### 3. GLOBAL MARKET ANALYSIS

#### 3.1 Global 3D Woven Fabrics Market: An Analysis

##### 3.1.1 Global 3D Woven Fabrics Market: An Overview

##### 3.1.2 Global 3D Woven Fabrics Market by Value

##### 3.1.3 Global 3D Woven Fabrics Market by Product Type (Solid, Hollow, Shell, and Nodal)

##### 3.1.4 Global 3D Woven Fabrics Market by Fiber Type (Carbon Fiber, Glass Fiber, and Others)

##### 3.1.5 Global 3D Woven Fabrics Market by End-User (Aircraft, Transportation, Building & Construction, and Others)

##### 3.1.6 Global 3D Woven Fabrics Market by Region (Europe, North America, Asia Pacific, Latin America, and Middle East & Africa)

#### 3.2 Global 3D Woven Fabrics Market: Product Type Analysis

##### 3.2.1 Global 3D Woven Fabrics Market by Product Type: An Overview

##### 3.2.2 Global Solid 3D Woven Fabrics Market by Value

##### 3.2.3 Global Hollow 3D Woven Fabrics Market by Value

##### 3.2.4 Global Shell 3D Woven Fabrics Market by Value

##### 3.2.5 Global Nodal 3D Woven Fabrics Market by Value

#### 3.3 Global 3D Woven Fabrics Market: Fiber Type Analysis

##### 3.3.1 Global 3D Woven Fabrics Market by Fiber Type: An Overview

##### 3.3.2 Global Carbon Fiber 3D Woven Fabrics Market by Value

##### 3.3.3 Global Glass Fiber 3D Woven Fabrics Market by Value

##### 3.3.4 Global Others 3D Woven Fabrics Market by Value

#### 3.4 Global 3D Woven Fabrics Market: End-User Analysis

##### 3.4.1 Global 3D Woven Fabrics Market by End-User: An Overview

- 3.4.2 Global Aircraft 3D Woven Fabrics Market by Value
- 3.4.3 Global Transportation 3D Woven Fabrics Market by Value
- 3.4.4 Global Building & Construction 3D Woven Fabrics Market by Value
- 3.4.5 Global Others 3D Woven Fabrics Market by Value

## **4. REGIONAL MARKET ANALYSIS**

### 4.1 Europe 3D Woven Fabrics Market: An Analysis

- 4.1.1 Europe 3D Woven Fabrics Market: An Overview
- 4.1.2 Europe 3D Woven Fabrics Market by Value
- 4.1.3 Europe 3D Woven Fabrics Market by Region (Germany, The UK, France, and Rest of the Europe)
- 4.1.4 Germany 3D Woven Fabrics Market by Value
- 4.1.5 The UK 3D Woven Fabrics Market by Value
- 4.1.6 France 3D Woven Fabrics Market by Value
- 4.1.7 Rest of Europe 3D Woven Fabrics Market by Value

### 4.2 North America 3D Woven Fabrics Market: An Analysis

- 4.2.1 North America 3D Woven Fabrics Market: An Overview
- 4.2.2 North America 3D Woven Fabrics Market by Value
- 4.2.3 North America 3D Woven Fabrics Market by Region (The US, Canada, and Mexico)
- 4.2.4 The US 3D Woven Fabrics Market by Value
- 4.2.5 Canada 3D Woven Fabrics Market by Value
- 4.2.6 Mexico 3D Woven Fabrics Market by Value

### 4.3 Asia Pacific 3D Woven Fabrics Market: An Analysis

- 4.3.1 Asia Pacific 3D Woven Fabrics Market: An Overview
- 4.3.2 Asia Pacific 3D Woven Fabrics Market by Value
- 4.3.3 Asia Pacific 3D Woven Fabrics Market by Region (China, India, and Rest of the Asia Pacific)
- 4.3.4 China 3D Woven Fabrics Market by Value
- 4.3.5 India 3D Woven Fabrics Market by Value
- 4.3.6 Rest of Asia Pacific 3D Woven Fabrics Market by Value

### 4.4 Latin America 3D Woven Fabrics Market: An Analysis

- 4.4.1 Latin America 3D Woven Fabrics Market: An Overview
- 4.4.2 Latin America 3D Woven Fabrics Market by Value

### 4.5 Middle East & Africa 3D Woven Fabrics Market: An Analysis

- 4.5.1 Middle East & Africa 3D Woven Fabrics Market: An Overview
- 4.5.2 Middle East & Africa 3D Woven Fabrics Market by Value

## **5. IMPACT OF COVID-19**

5.1 Impact of COVID-19 on Global 3D Woven Fabrics Market

5.2 Post-COVID-19 Impact on Global 3D Woven Fabrics Market

## **6. MARKET DYNAMICS**

6.1 Growth Drivers

6.1.1 Escalating Use in Medical Industry

6.1.2 Increasing Adoption of Renewable Energy Sources

6.1.3 Growing Air Passenger Traffic

6.1.4 Rising Electric Car Sales

6.1.5 Growing Construction Industry

6.1.6 Growing Demand for Carbon Fibers

6.1.7 Favorable Government Regulations and Standards

6.2 Challenges

6.2.1 Increasing Raw Material Prices

6.2.2 Technological Limitations in Manufacturing and Utilization

6.3 Market Trends

6.3.1 Advancements in Manufacturing and Weaving Technologies

6.3.2 Increasing Application in Apparel Industry

6.3.3 Increasing Applications in Defense Industry

6.3.4 Customization and Versatility

6.2.5 Research & Development

6.3.6 Digitalization and Simulation Tools

6.3.7 Development of Sustainable 3D Woven Fabrics

## **7. COMPETITIVE LANDSCAPE**

7.1 Global 3D Woven Fabrics Market: Competitive Landscape

## **8. COMPANY PROFILES**

8.1 Textum OPCO LLC

8.1.1 Business Overview

8.1.2 Business Strategy

8.2 Tex Tech Industries

8.2.1 Business Overview

8.2.2 Business Strategy

### 8.3 Sigmatex Ltd.

#### 8.3.1 Business Overview

#### 8.3.2 Business Strategy

### 8.4 Cristex Composite Materials

#### 8.4.1 Business Overview

#### 8.4.2 Business Strategy

### 8.5 China Beihai Fiberglass Co Ltd.

#### 8.5.1 Business Overview

#### 8.5.2 Business Strategy

### 8.6 Topweaving New Material Tech Co., Ltd.

#### 8.6.1 Business Overview

### 8.7 U-Long High-Tech Textile Co., Ltd.

#### 8.7.1 Business Overview

### 8.8 3D Weaving SaRL

#### 8.8.1 Business Overview

### 8.9 Tantra Composite Technologies

#### 8.9.1 Business Overview
