## Executive Summary

The concept of music industry business revolves around the fundamental that companies and individuals make revenues and profits by creating and selling recorded music, live music performances (also known as concerts) and videos of songs and instrumental pieces.

Concert or the live music is a performance in front of the large audience. The live performance generates revenue through sale of tickets of the concerts to fans, advertising and sponsorships. The concerts are held in varying size of settings that include private houses, small nightclubs, concert halls, entertainment centres, parks to large multipurpose buildings and sports stadiums, etc. The concerts are live events that work with professional audio equipment.

The concert industry operates encompassing several players such as fans, ticket vendor, promoter, artist, manager, sponsor and venues.

Global concert market has increased at a significant CAGR during the years 2011-2015 and projections are made that the market would rise in the next four years i.e. 2016-2020 tremendously. The concert market is expected to increase due to growth in urban population, improving global infrastructure, increasing global GDP and GDP per-capita, increase in use of smartphones, etc. Yet the market faces some challenges such as, safety issues, competitive guarantee and downturn in global economy.
