SCOPE OF THE REPORT

The report titled “Global Dental Market (by Segment, Equipment, Consumables and Software) Size, Trends & Forecasts (2018-2022)”, provides an in-depth analysis of the global dental market by value, by consumables, by equipment, by software and by region, etc.

The report provides a regional analysis of the dental market, including the following regions: Asia-Pacific, North America, Middle East and Africa, Latin America, and Europe. The report also assesses the key opportunities in the market and outlines the factors that are and will be driving the growth of the industry. Growth of the overall global dental market has also been forecasted for the period 2018-2022, taking into consideration the previous growth patterns, the growth drivers and the current and future trends.

Global dental supplier market is highly fragmented due to the presence of several established international and regional vendors. The market is highly competitive due to the vast range of products available, and there are different regional and global manufacturers for different types of dental products. Also, the customer base in the dental market is highly fragmented. However, there is a trend of increasing consolidation among dental practitioners and a shift to group practice models.

Further, key players of the dental market Dentsply Sirona, Danaher Corporation, 3M Company and Planmeca Group are also profiled with their financial information and respective business strategies.

EXECUTIVE SUMMARY

Sound oral health and hygiene is of utmost importance for the overall well-being. With changing times, humans are witnessing altered lifestyles and eating habits, of which some are healthy and some are unhealthy. The unhealthy dental habits are the root of severe dental problems such as dental carries, oral cancer, malocclusions, etc. Dental diseases could be classified into periodontitis, gingivitis and dental caries. Dental has a very strong history finding its roots back into the era of Neolithic sites in Baluchistan.

The global dental market could be segmented into dental equipment, dental consumables and dental software. The dental equipment includes the tools, appliances and apparatus which are specifically designed to aid diagnosis, monitoring or treatment of a patient suffering from diseases of the teeth and gums.

Dental consumables are used on patients by dental practitioners or dentists in order to treat and perform procedures associated with preventive, restorative, diagnostic and emergency oral health issues.

Dental software is a computer technology used by dental professionals, dental laboratories, dental academic and research institutes, and forensic laboratories for the diagnosis, prevention, treatment, research, and investigation of oral health conditions. The global dental market has increased at a significant CAGR during the years 2016-2017 and projections are made that the market would rise in the next four years i.e. 2018-2022 tremendously.

The dental market is expected to increase due to growth in female population, declining prices of tobacco, increasing GDP per-capita, etc. Yet the market faces some challenges such as, less number of dentists in emerging countries, high cost of dental software and lack of dental awareness.
