Executive Summary

The global food service market is split on the basis of three parameters namely outlet type, system type and end user. On the basis of outlet type, the market is sub segmented into full service restaurants, quick service restaurants, caf? and bars and fast casual restaurants. On the basis of system type, the market has been split into conventional, centralized, ready made and assembly service systems. On the basis of end users, the market has been sub divided into commercial and non commercial.

The global food service market is forecasted to grow at a healthy rate during the projected period (2021-2025). The market is supported by various growth drivers such as growing spending on food away from home (FAFH), inflation in demand for outsourcing services, spike in number of business and industries (B&I), surging global gross national income and expanding middle class population. The market also faces challenges such as catering to client expectations, increasing food safety issues and stringent regulatory laws.

Customization in food menu, fueling demand for healthy food, growing number of mergers and acquisitions (M&A), high demand for gluten free food and emergence of online food ordering platforms are some of the latest trends existing in the market.
