## Executive Summary

The global instant noodles market has been segmented on the basis of product type, source and packaging type. On the basis of product type, the market can be further split into sea food, chicken, beef, pork and vegetables. On the basis of source, the market is bifurcated into wheat, rice and oats. The market has been divided into packets and cups on the basis of type of packaging.

The global instant noodles market is forecasted to grow at a healthy rate during the forecast period (2021-2025). The market is supported by various growth drivers such as increasing working population, rise in disposable income, ascending middle class population, high demand for convenience food and use of instant noodles in the case of emergency situations like natural disasters. The market is also confronted by some challenges such as food safety concerns taking toll on consumer acceptance and vulnerability to supply chain disruption.

Fortification of instant noodles, spike in demand for clean label products, proliferation of social media platforms, launch of variants as per taste of different regions and opportunities for instant noodle companies to strengthen distribution channels are some of the latest trends existing in the market.
