Executive Summary

Online advertising provides a platform on which the publisher allows the advertiser to display the company's product advertisement on the website or mobile application. Online advertisement can be segmented in different types, such as web-banner advertising, floating advertisements, display advertising, video advertising and many other.

The automotive industry is leveraging increased penetration of online platforms for transforming its marketing skills. The reinvigoration of marketing skills is taking place via development of online portals, users can visit these portals through online advertisement. In addition, online ad enables advertiser to highlight vehicle feature to attract new customers and amplify their customer base.

The global online auto ad market has perceived progressive growth in the past few years and it is expected that during the forecasted period (2020-2024) the market would augment at an escalating growth rate. The global online auto ad market growth would be supported by numerous growth drivers such as escalating urban population, growing smartphone penetration, upsurge in internet of things (IoT) devices, increasing number of video streaming users, increase in digital buyers, emerging number of internet users and many other factors.

However, the growth of global online auto ad market would be negatively impacted by various challenges. Some of the foremost challenges faced by the market are audience fragmentation, fraud, piracy & malware and ad blocking. Whereas, the market growth would be further supported by various market trends like growth in chatbot technology, rising artificial intelligence technology, etc.

Contents
