Executive Summary

The global prostate cancer market has shown tremendous growth over the past few years and projections are made that the market would grow at a rapid pace over the forecasted period (2020-2024) as well. The aging population and altering lifestyle are the major factors contributed in the growth of market. Moreover, expanding healthcare cost, rising public awareness towards the disease, availability of generic drugs etc. would further augment market growth.

However, the market faces some challenges which are hindering the growth. Some of the major challenges faced by the industry are: increasing economic burden of the disease, side-effects associated with treatment, over diagnosis issue etc. Though, the market growth would be further supported by various market trends like increasing use of diverse therapies, approval of novel treatments and drugs, advancements in prostate cancer research etc.
