Executive Summary

Rail kits are products that are used in the easy movement of furniture such as drawers and cabinets. It consists of slides, hangers and hinges. Earlier rail kits were used only in furniture, but now server industry is one of the major customers of rail kit industry. Thin, compact and easy to install, it is suitable for linear guides for various applications.

The global rail kit market observed rapid growth over the past few years and projections are made that the market would rise in the next five years i.e. 2017 to 2021. Primary factors behind the growth of the market are growing server industry, rising demand for modular kitchens, rising middle class income, etc.

In the forecasted period market would be pushed by rising white box server market, increasing use of rails in major industries such as medical, telecommunication, and transportation, etc.; and online availability of rail kits. Yet, the market faces some challenges such as rising price of raw materials, barriers of new entrants, and corrosion property of aluminium, which is key raw material in the manufacturing of rail kits.
