Executive Summary

Flooring refers to the surface beneath the feet that is used to walk upon and perform other activities. The flooring is an essential part of any occupancy, place or space. The components of flooring include floor base and floor covering. The flooring could be segregated on the basis of resilience into Resilient flooring, Non-Resilient flooring and Soft flooring.

The soft flooring refers to the flooring that is manufactured from materials such as wool, jute, polyamide, polypropylene, or any other material used in the textile industry. The soft flooring includes carpets, rugs, broadlooms and mats. The soft flooring has applicability in the residential, commercial, sports and other industrial sectors. Manufacturing process of soft flooring includes tufting, weaving and needle punching.

The global soft flooring market has increased at a significant CAGR during the years 2015 and 2016 and projections are made that the market would rise in the next four years i.e. 2017-2021 tremendously. The soft flooring market is expected to increase due to growth in GDP per-capita, rise in global residential spending, infrastructure development, etc. Yet the market faces some challenges such as, availability of counterfeit products, continual innovation and high barriers to entry, etc.
