## Executive Summary

Apparel worn while playing outdoor sports (football, basketball, hockey and others), in gym, while cycling or while doing any strenuous physical activity are known as sports apparel. Sports wear or apparel includes sports bra, tights, shorts, t-shirts etc. Sport apparel foremost aim is to provide comfort and performance. Sports apparel has better sweat and body odor absorption than the regular clothes. The moisture management, elongation and recovery are largely controlled by the use of special fibers and yarns, with softeners to enhance or supplement the effects.

The sports apparel market can be segmented on the basis of end-users, named as men, women and children; and on the basis of distribution channels, such as e-commerce, supermarket/mall, discount stores/ specialty stores and others.

The global sports apparel market has increased significantly during the years 2016-2020 and projections are made that the market would rise in the next four years i.e. 2021-2025 tremendously. The sports apparel market is expected to increase due to increase in Gen Z income, influence of social media, penetration of e-commerce, rising health consciousness among people, upsurge in urbanization and shift towards comfortable fashion. Yet, the market faces some challenges such as economic

slowdown, sustainability and degree of competition.
