EXECUTIVE SUMMARY

UCC or unified communication and collaboration is the service which delivers multiple communication methods. Such as Business phone system, Voicemail, Instant message, Chat, Fax, Conference call bridge, Video conferencing, IVR and more. Unified communication and collaboration is also capable of integrating e-mail, web applications, social media, and business tools on cloud.

UCC is composed of many benefits such as improved work quality, faster services, enhanced employee flexibility, reduced expenditure, etc. On the basis of services, UCC is categorized into three services: UCaaS, CCaaS, and CPaaS. Unified Communications as a Service (UCaaS) is responsible for cloud based delivery of voice chats, emails, chats, etc. It can be either subscribed or free. Whereas, Contact Center as a Service (CCaaS) offer customer service solutions and Communications Platform as a Service (CPaaS) provide API's and software tools for developers to add real-time cloud.

Few of the top UCC system are cloud based UC, video UC, webRTC, mobile UC, lync, etc. Some major advantages of applying UCC for communication system are greater flexibility, tech-savvy, beneficial for remote or working from home employees and easy for new trainees.

The global UCC market with focus on UCaaS is expected to increase at high growth rates during the forecasted period (2019-2023). The global UCC market with focus on UCaaS is supported by various growth drivers, such as growth in enterprise customers, growing penetration of smartphones and large scale investment, favorable changes to accounting standards, etc. Yet, the market faces certain challenges, such as, hyper converged network, high competition, etc. Few new market trends are also provided such as, tight integration between CCaaS and CRM , new product launch, etc.
