Abstracts

SCOPE OF THE REPORT

The report entitled "Global Web-Managed Switching Market: Size, Trends & Forecasts (2018-2022)", provides analysis of the global web-managed switching market, with detailed analysis of market size and growth, and segmentation of the industry. The analysis includes the market by value and by volume. Regional analysis is also provided for North America, Europe, Middle East & Africa (EMEA), Asia-Pacific (APAC), and Central & Latin America.

Moreover, the report also assesses the key opportunities in the market and outlines the factors that are and will be driving the growth of the industry. Growth of the overall global web-managed switching market has also been forecasted for the years 2018-2022, taking into consideration the previous growth patterns, the growth drivers and the current and future trends.

Ubiquiti Networks, Netgear Inc., Cisco and HPE (Aruba) are some of the key players operating in the global web-managed switching market, whose company profiling has been done in the report. In this segment of the report, business overview, financial overview and business strategies of the companies are provided.

REGIONAL COVERAGE

North America

Europe, Middle East & Africa (EMEA)

Asia-Pacific (APAC)

Central & Latin America

COMPANY COVERAGE

Ubiquiti Networks

Netgear Inc.

Cisco

HPE (Aruba)

EXECUTIVE SUMMARY

Enterprise switches are usually used in networks with greater number of computers, switches and connections, where centralized management plays a role of significant saver in organization's time and effort. In normal enterprise network, core switch along with supplementary distribution layer switches leads the operations, in order to carry all the information into the data center and disseminate it to the access layer where the end users are located and resulting in less data traffic.

Enterprise switches are of two types: fixed configuration switches (No features or options addition can be done beyond the equipped features of the switch) and modular switches (more flexibility in configuration). Fixed configuration switches can further be subdivided into three types of switches namely, unmanaged switches, managed switches and web-managed switches.

Web-managed switches operates via web browser. These switches provides various facilities such as port monitoring, link aggregation, and VPN through a web interface, etc. Web-managed switches are also known as smart switches and web-smart switches. Some of the prominent features presented by web-managed switches includes advanced quality of service, loop detection and broadcast storm control, port trunking, etc.

Global Web-Managed Switching Market: is expected to increase at high growth rates

during the forecasted period (2018-2022). The global web-managed switching market is supported by various growth drivers, such as changes in data center architecture, growing enterprise networks, extensive growth of data traffic, etc. yet, the market faces certain challenges, such as, lack of trained professionals, etc. few new market trends are also provided such as, increasing number of devices on the network , growing demand by large enterprises, etc.

Contents

1. EXECUTIVE SUMMARY

2. INTRODUCTION

2.1 Enterprise Switches: An Overview

2.1.1 Enterprise Switches: Meaning

2.1.2 Types of Switches

2.2 Web Managed Switches: An Overview

2.2.1 Web Managed Switches: Meaning

2.2.2 Some Features of Web Managed Switches

3. GLOBAL MARKET ANALYSIS

3.1 Global Web-Managed Switching Market: An Analysis

3.1.1 Global Web-Managed Switching Market by Value

3.1.2 Global Web-Managed Switching Market by Volume

3.1.3 Global Web-Managed Switching Market Value by Region (North America, Europe, Middle East & Africa (EMEA), Asia-Pacific (APAC), and Central & Latin America)

3.1.4 Global Web-Managed Switching Market Volume by Region (North America, Europe, Middle East & Africa (EMEA), Asia-Pacific (APAC), and Central & Latin America)

4. REGIONAL MARKET ANALYSIS

4.1 North America Web-Managed Switching Market: An Analysis

4.1.1 North America Web-Managed Switching Market by Value

4.1.2 North America Web-Managed Switching Market by Volume

4.2 EMEA Web-Managed Switching Market: An Analysis

4.2.1 EMEA Web-Managed Switching Market by Value

4.2.2 EMEA Web-Managed Switching Market by Volume

4.3 APAC Web-Managed Switching Market: An Analysis

4.3.1 APAC Web-Managed Switching Market by Value

4.3.2 APAC Web-Managed Switching Market by Volume

4.4 Central and Latin America Web-Managed Switching Market: An Analysis

4.4.1 Central and Latin America Web-Managed Switching Market by Value

4.4.2 Central and Latin America Web-Managed Switching Market by Volume

5. MARKET DYNAMICS

5.1 Growth Drivers

- 5.1.1 Changes in Data Center Architecture
- 5.1.2 Growing Enterprise Networks
- 5.1.3 Extensive Growth of Data Traffic
- 5.1.4 Internet of Things
- 5.1.5 Economic Development and Maturing IT Infrastructure
- 5.1.6 Evolving CMOS Technology: Make 100G Mainstream

5.2 Challenges

- 5.2.1 Lack of Trained Professionals

5.3 Market Trends

- 5.3.1 Ethernet Networks: Platform for All Types of Applications
- 5.3.2 Increasing Number of Devices on the Network
- 5.3.3 Growing Demand by Large Enterprises

6. COMPETITIVE LANDSCAPE

6.1 Global Web-Managed Switching Market: Player Analysis

- 6.1.1 Global Web-Managed Switching Market Share by Player
- 6.1.2 Global Web-Managed Switching Market Volume Share by Player
- 6.1.3 Global Web-Managed Switching Market Player by Average Price Per Port

7. COMPANY PROFILING

7.1 Ubiquiti Networks

- 7.1.1 Business Overview
- 7.1.2 Financial Overview
- 7.1.3 Business Strategy

7.2 Netgear Inc.

- 7.2.1 Business Overview
- 7.2.2 Financial Overview
- 7.2.3 Business Strategy

7.3 Cisco

- 7.3.1 Business Overview
- 7.3.2 Financial Overview
- 7.3.3 Business Strategy

7.4 HPE (Aruba)

7.4.1 Business Overview

7.4.2 Financial Overview

7.4.3 Business Strategy
