Executive Summary

The Indian pipes business has been growing rapidly since the past several years mainly due to increasing demand for pipes in the irrigation sector, for crude oil, real estate industry and growth in Gross domestic product (GDP) of the country. Among the several varieties of pipes available in the market, the demand for plastic pipes such as PVC, CPVC in particular, is on a rise due to its low cost, high quality and high durability. Other types of pipes, like steel pipes and ductile iron pipes also have major demand. Nationwide infrastructural development, urbanization, government's focus on real estate, irrigation to drive agricultural growth have been identified as major factors facilitating the growth of the pipes industry in the country.

The Government of India is launching new schemes in the irrigation and the real estate sector for significant investments. It is evident here that the focus of Indian government is on water supply for housing sector, which will only be fulfilled with effective use of pipelines.
