Greenply Industries Ltd

National Plywood industries Ltd.

Kitply Industries Ltd.

### Executive Summary

The Indian plywood and laminates industry manufactures various engineered woods like plywood, laminates, MDF and veneers. Plywood is the most demanded product of this industry followed by laminates. MDF on the other hand is a small segment of the Indian industry.

The market could be segmented on the basis of distribution channels where the unorganized market accounts for the major share. However with changing consumer preferences the market has seen a shift towards the organized segment due to increased demand for good quality and branded products. The share of organized players in the industry is expected to rise further in the years to come. This shift is taking place primarily due to urbanization and more disposable income.

The market for plywood and laminates is mainly driven by increasing demand from housing market. The demand has increased due to growing significance of new construction industry. Plywood and laminates have become an indispensable part of big and evolving markets like real-estate market, furniture market, modular kitchen market as well as the flooring market. The increased demand in these markets triggers the demand in the plywood and laminates market. Apart from this, increasing urban population, rising per capita income and a gradual shift towards non-food industry are other key factors driving the growth of plywood and laminates industry in India. Further, the implementation of Goods and services Tax (GST) in the near future will provide an impetus to plywood and laminate industry.
