Executive Summary

An anesthetic is a drug to avoid pain during surgery. A wide variety of drugs are used in modern anesthetic practice. Many are rarely used outside of anesthesia, although others are used commonly by all disciplines. All the drugs are categorized under the three main categories, namely, general anesthesia, regional anesthesia and local anesthesia.

Anesthesia is required in mostly all surgery. Anesthesia is a pain remover during surgery. Though it is a pain killer, there are many side effects of using anesthesia which may vary according to the type of the drug or the physical response of the patients like allergy. The side effects occurs in many forms like nausea, vomiting, sore throat, headaches, back pain etc. Anesthesia is gaining popularity in the US usually in the age group between 50 years age to 75 years of age.

The US anesthesia drugs and devices market progressed at a steady pace after the spread of COVID-19 pandemic. Furthermore, the market is expected to increase at high growth rates during the forecasted period (2021-2025).

The US anesthesia drugs and devices market is supported by various growth drivers, such as increasing geriatric population, increase in monitored anesthesia use, growing healthcare expenditure, etc. Yet, the market faces certain challenges, such as, side effects of anesthesia, lack of skilled anesthesiologist, etc. Few new market trends are also provided such as, escalating establishment of ambulatory surgical centers (ASC), technological enhancement of anesthesia devices etc. Furthermore, the impact of Covid-19 pandemic is also analyzed in the report.
