Executive Summary

The hip reconstruction market can be segmented on the basis of type. There are four major types of hip reconstruction procedures: Primary Total Hip Reconstruction, Partial Hip Reconstruction, Hip Resurfacing and Revision Hip Reconstruction. Primary Total Hip Reconstruction is further segmented into three types: Cemented Hip Reconstruction, Cementless Hip Reconstruction and Hybrid Hip Reconstruction.

The US hip reconstruction market has increased at a significant CAGR over the years and projections are made that the market would rise in the next four years i.e. 2021-2025 tremendously. The hip reconstruction market is expected to increase due to aging population, growing prevalence of arthritis, increasing obesity, growth in chronic diseases, escalating healthcare expenditure, etc. Yet the market faces some challenges such as high cost involved, regulatory risk, etc.
