Executive Summary

It is important to note the demand for pet food and supplies has been witnessing significant acceleration post the advent of online channels backed by the constant customer requirement for convenient shopping.

The online pet food and supplies market can be segmented into pet foods and supplies. Pet foods products are divided on the basis of pets, product type, ingredients and price. Pet supplies on the other hand have been further classified into hygiene care supplies, medications and accessories.

The US online pet food and supplies market is expected to increase at a significant growth rate during the forecasted period (2021-2025). The market is supported by various growth drivers such as surging pet ownership in the US, rising disposable income and continuously increasing urbanization. However, the market also faces some challenges such as tough completion from the offline pet food and supply players and vulnerability to changing consumer preferences.

Online customization of pet food, Rising spending on pet food and supplies, increasing internet penetration across devices, vendors ensuring convenient availability through online channels and millennials evolving of millennial as lucrative customer segment for pet foods are some of the latest trends existing in the market. The Covid-19 induced lockdowns and social distancing regulations have accelerated spending on pet foods and supplies through online channels. Pet owners are refraining from shopping of pet products in store as they are conscious about contracting the virus.
