Executive Summary

Sports nutrition refers to a practical daily eating plan dedicated to deliver the energy for physical activity, assisting the renovation and rebuilding process succeeding rigorous physical work, and augmenting athletic performance in competitive events, while also encouraging overall fitness and wellness.

The sports nutrition can broadly classify into two categories such as Protein Nutrition/Supplements and Non-Protein Nutrition. Protein nutrition/supplements are developed by animal-based as well as plant-based proteins. Non-protein sports nutrition products are those which based on caffeine and creatine, an amino acid, are generally taken pre-workout.

The US Protein supplements market is expected to increase at high growth rates during the forecasted period (2018-2022). The US protein supplements market is supported by various growth drivers, such as, increasing urbanization, upsurge in obese population, growing purchase of vitamins and nutrition supplements, etc.
