## EXECUTIVE SUMMARY

Yogurt is semi-solid dairy food that is prepared from milk and fermented by added bacteria. The bacteria such as *Lactobacillus Bulgarica* and *Streptococcus Thermophilus*, are used in preparation of yogurt. Yogurt was discovered accidentally and has its prevalence and significance throughout history.

Yogurt market has been segmented on the basis of method of intake, yogurt nature and Greek yogurt. Yogurt has varied applicability for instance it soothes sunburn, can be used as hair conditioner, could be used for facial, etc.

The US Yogurt market has increased at a significant CAGR during the years 2010-2017 and projections are made that the market would rise in the next four years i.e. 2018-2022 tremendously.

The yogurt market is expected to increase due to growing milk production in the US, increasing GDP per-capita, growing health consciousness among the US population, etc. Yet the market faces some challenges such as yogurt is prone to contamination if left unattended.
